U.S. Patent and Trademark Office PTOL-326 (Rev. 7-05) Application/Control Number: 10/613,135 Page 2

Art Unit: 1732

1.Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-26, drawn to a process for preparing a foam of thermoplastic material, classified in class 264, subclass 53.
- Claim 27, drawn to a foamed thermoplastic article, classified in class 521, subclass 50.
- III. Claim 28-48, drawn to a physical foaming agent concentrate, classified in class 106, subclass 122.
- 2. The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article structure as claimed, or as imputed from the steps practiced, can be made by another and materially different process such as one in which a decomposition-type (chemical) blowing agent is used to form the foamed article.

Inventions I and III are related as a composition and a process of using that composition to form a foamed thermoplastic article. These inventions are distinct because the composition or concentrate as claimed can be used in another and materially different process such as one in which the concentrate functions as a propellant.

Inventions II and III are related as a composition and a product formed using that composition. These inventions are distinct because the article structure as claimed, or as imputed from the steps practiced, can be formed from another and materially different composition such as one in which a decomposition-type (chemical) blowing agent is used.

- 3.Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring divergent fields of search for the respective inventions, restriction for examination purposes as indicated is proper.
- 4.A telephone call was made to Julie Seaman on December 1, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 5.Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (571) 272-1202. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni, can be reached on (571) 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
